

## NAUTICAL 3000 BOATWASH SYSTEM

After coming back to your slip from fishing or cruising clean your boat using the [NAUTICAL 3000 BOATWASH SYSTEM](#). This high quality, portable system will supply stain-free/softened water for safe wash down of your boat. With this system, you'll virtually eliminate unsightly rust stains and hard water spots caused by typical well water. While water softener systems are not "spot-free", this system greatly reduces the spotting associated with untreated, hard water. Although designed for washing down boats, this system can be used where soft/stain-less water is desired.

The [NAUTICAL 3000 BOATWASH SYSTEM](#) will produce approximately 3000 gallons of treated water<sup>1</sup>. To rejuvenate the system, change out the filter cartridge with a specially designed refillable salt cartridge. (Instructions supplied with the system).

The [NAUTICAL 3000 BOATWASH SYSTEM](#) comes with the following:

- Softener Tank Assembly with garden hose connections
- Sediment Cartridge Filter with a 20-micron cartridge
- Refillable Salt Cartridge
- 4 ft Dockside Inlet Hose

Options:

- Decorative Rope Winding on tank
- Activated Carbon Filter Cartridge (for odor)

While this system is designed for washing boats, it can be used to fill onboard water tanks for fresh water wash down, showering and cooking. This system is not designed for drinking water. Optional filter systems are available for drinking water applications. Check out our [MWC-ULTRA4 Ultrafilter System](#).

Available From:

<sup>1</sup>Based on 3 grains/gallon hardness & 1 ppm iron (Fe++)
